

# Warehouse Space & Pallet Storage Facilities

Ningbo Distribution offers a comprehensive warehousing and storage solution, operating from our Distribution Centre based on Wrexham Industrial Estate.

Our 75,000 sq ft warehouse is fully secured, with CCTV throughout the premises and an electric gated yard area, the site is also alarmed with remote surveillance. Our Stirling stock management system provides full traceability of goods with a barcode scanning system, live stock availability (by email or online), stock control reports and document printing.

We can offer both racked and non-racked storage contracts which can be tailored to meet your timescales and production schedules, whether that is for the short or long term, static goods or high turnover products.

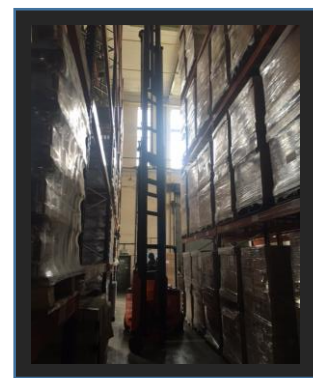

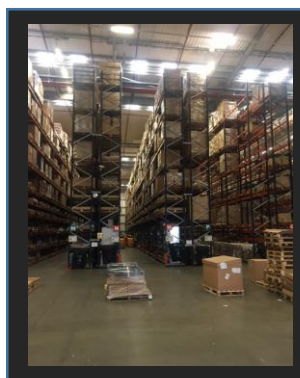

We are a member of the RHA and also have BRC Warehouse accreditation.

To compliment the warehouse packages, Ningbo Distribution can provide a UK distribution service, dispatching goods on Next Day, Timed Sensitive and Economy services.
