## OUR STORY

Big Web Warehouse is an established storage and fulfilment centre which was started in 1999 and has grown year on year bringing new technologies to enable us to streamline fulfilment activities, keeping attractive and competitive rates for our customers.

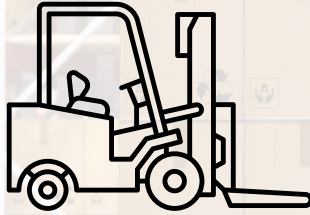

With over 23 years experience, we've worked with a vast array of businesses, storing and picking anything from single bolts and crafting supplies, to cribs and washing machines. If it fits on a pallet and it's not dangerous, we've probably stored it.

We pride ourselves on our adaptable approach to storage and flexibility to meet all our customers needs. We are audited members of the United Kingdom Warehouse Association (UKWA) and operate to all their standard Terms and Conditions.

## WHAT OUR CUSTOMERS SAY

*"We moved from another fulfilment facility to Big Web back in 2016 and were concerned about issues we had faced at our previous warehouse - we need not have worried. The team at Big Web have been fantastic, they helped us sort the stock we brought in and created bespoke processes for our orders. We have dealt with the same Big Web team members for 6 years now, they are always friendly and helpful and have become part of the Bloom family".*

*-Bloom Baby*

# WHY CHOOSE US

**FLEXIBILITY** - full range of services available to help with your specific business needs.

**FAMILY OWNED** - and run business formed in 1999 means you have a wealth of experience at your fingertips.

## OUR SYSTEMS

Our bespoke Warehouse Management System (WMS) can help revolutionise your business.

With flexible solutions and real-time visibility you can be in full control of your operations anytime, anywhere.

# OUR INTEGRATIONS

Big Web Warehouse will always collaborate with our clients to make sure we can provide systems that will work with the platforms you want to use. If we're not already fully integrated, we will do our best to make that happen, whenever it's possible with our in-house development team and software solutions.

When you partner with us you also partner with our in-house development team. Our skilled team enables us to provide flexibility that is scalable.

You might not be thinking too far ahead right now, but when you start to think about continuing your growth, you can count on us to support your journey.
