

MASTERS

MASTERS LOGISTICAL - FLEXIBLE WAREHOUSING SERVICES

At Masters' we offer a completely flexible warehousing service at our East Anglia base close to the A14. We have the complete solution for container handling, racked and bulk storage, inventory control and pick and pack operations. If you need warehouse space but don't want the overhead or capital cost that goes with building, renting or managing a warehouse, you need to talk to us.

WHY OUTSOURCE YOUR WAREHOUSING REQUIREMENTS TO MASTERS?

Most of Masters' customers have variable warehousing requirements that require a very flexible, detailed level of service.

Detail is what we're good at. We know, because that's what our customers tell us.

It's because we (sometimes literally) go the extra mile to make sure that any product that comes into our warehouse, in whatever container, and in whatever condition, is treated with the same high level of care, efficiency and attention.

WHAT CAN WE OFFER YOU?

Our warehousing facilities and services include the following:

- 85,000 sq ft of palletised storage space
- 6000 rack locations
- 3000 bulk stack pallet capacity
- 26,000 sq ft of heated storage
- State of the art warehouse management system for rapid stock retrieval
- Flexible warehousing, including seasonal store-and-fulfil services
- Fast, efficient, environmentally-friendly machine wrapping
- All-weather canopies for fast loading and unloading in all weather conditions.

"At Masters, we don't do answering machines or call handling systems."

Phone us anytime to talk to a real person!

A SKILLED AND DEDICATED TEAM

The key to our service is a skilled and dedicated warehouse team who are focused on getting the job done - on time, every time. Supported by modern technologies such as our warehouse management system and machine wrapping processes, our team all share the same vision and goal: to be the ideal partner for manufacturers, importers, wholesalers and retailers needing a fully integrated outsourced warehouse solution, flexible or overflow warehouse capacity.

CONTAINER HANDLING

Masters is located on the A14, just North East of Cambridge, with easy access to the Port of Felixstowe and onward to London, the South East and the Midlands.

That means we're ideally placed to receive and process container loads of all types of goods directly from the port. On arrival, we promptly empty your container and reconcile the contents to the manifest. We then confirm receipt and alert you to any issues such as damaged or missing items. Finally, your goods are palletised for storage or onward distribution.

WAREHOUSING

At Masters' we always employ the most efficient stacking patterns but will also follow your specific stacking instructions if required.

We also use machine wrapping rather than hand-wrapping, because it's more robust, quicker, cheaper and better for the environment.

RACKING AND BULK STACK STORAGE

Our modern warehousing facilities are clean, dry, well organised and extremely spacious! Up to one third (26,000 sq ft) of our warehousing space can be heated.

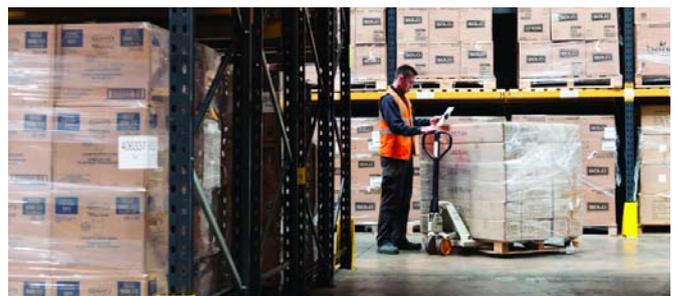

On arrival into our receiving area, every pallet is checked for damage before being stored and labelled. Its details are logged on our Stirling warehouse management system, so that any item from the up to 10,000 pallets in storage can be instantly located and retrieved.

INVENTORY CONTROL AND 'PICK & PACK'

Masters' inventory control service helps us manage every movement of your goods from the moment they arrive at the warehouse to the time they are despatched, including FIFO stock rotation and pick and pack order fulfilment.

This expertise has earned us an excellent reputation across many industry sectors for speed and efficiency in handling both loose and packaged products of all sizes and shapes.

We also manage seasonal order fulfilment for our clients including receipt, inventory control, pick and pack and despatch via third party courier or Royal Mail.

Request a quote for your warehousing requirement or visit us to inspect our facilities.
