

An Overview

Rarter
Bond
Excise Warehousing

Welcome to Rarter:

- **Rarter started trading at what was then Yeadon Airport Depot in 1978.**
- **The site is a fully secure site with on-site security 24/7. There is CCTV cover monitored by gatehouse staff and limited access points from outside.**
- **Over the years we have expanded from a general storage warehouse to one that really specialises in providing services to the drinks industry.**
- **We became an Excise Warehouse in 1985 and this side of the business has developed ever since.**
- **The warehouse extends to some 140,000 square feet and is effectively a ground floor “basement” having no external walls or roof.**

The Warehouse Overview

Inherently secure.

Has no major or sudden changes in temperature.

Is low enough that we do not store pallets on racking or on top of each other.

- As such its ideal for the storage of alcoholic beverages although we do have some non-drink products in store. It is also ideal where picked orders are required.
- The office and the warehouse staff have years of experience in Bonded Warehousing, and we can help new entrants to develop their businesses and fully understand the HMRC regulations that control the industry.
- Our charges are based on RH&D (handling) and Rent (per week)
- Charges can be expressed in terms of cartons or pallets depending on the type of traffic involved.
- We also offer added value facilities as described on our services page
- We operate under [UKWA Conditions of Contract](#).

Excise Warehousing

Our Services:

- Handling
- We handle every type of goods from: full pallets, single mixed pallets, full palletised container loads/ handball containers.
- Storage
- Goods are stored in specific areas of the warehouse allocated to each individual client. This makes stock taking and order picking easier and more efficient
- Order picking
- This can be anything from single bottles/eCommerce orders, cases, through to full pallets.
- Goods being collected for onward delivery are palletised and wrapped on our automatic wrapping machines to ensure that they are stable and protected during transit. This can be either clear or black wrapping.

Our Services:

- Added value services
- We can:
 - Attach duty stamps to spirits destined for the UK market that are as yet unstamped.
 - Check labels on 3rd country goods to check label compliance.
 - Label goods that fail to meet labelling legislation.
 - Create mixed cartons.
 - Repack for delivery.
 - Undertake eCommerce Activities.
 - Re-palletise on to specific pallets if required.
 - Provide periodic stock returns either by rotation number, product code or product type.
 - Arrange destructions under duty suspension of goods that are not fit for sale.
