Company Overview

PRL Logistics are a leading end to end logistics business providing an industry leading service to some of the UK's best known brands.

We have a forward thinking approach to innovation, supporting our clients global sourcing and Net Zero ambitions via a consolidated reverse logistics solution.

Long-standing partnerships with blue chip companies is testament to our ability to deliver a consistently high standard, identifying us as the partner of choice for our clients.

We work with our partners to support their global sourcing supply chain by providing an end to end logistics solution including warehousing, distribution, asset recycling and installation services.

As part of the Fit Out UK group of companies, we benefit from a long established global supply chain and a robust financial standing.

Facilities

Operating over 400,000 sqft of strategically located warehousing space in London, Sheffield, Barnsley and Doncaster, we provide a nationwide UK distribution service and a range of storage options including racked facilities, bulk storage, bonded warehousing and external container storage. All our services are supported by state of the art warehouse management and security systems.

In addition, our in house vehicle fleet and bespoke route planning systems ensure we deliver on time, every time.

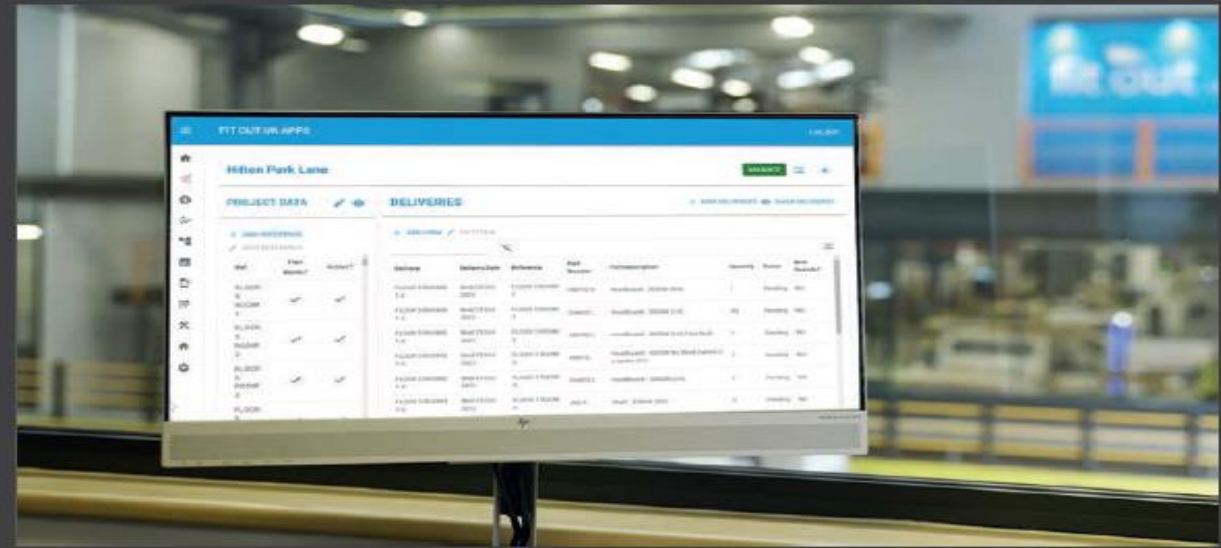

Customer Portal

We have made a considerable investment in our integrated WMS systems, online logistics portal, and on-site progress reporting, simplifying process and maximising supply chain efficiencies.

This provides full visibility of the logistics process providing real-time data on stock visibility, call-off and delivery via online POD signature capture.

Further synergies include:

- Reduced administration and email traffic
- Fewer vehicle loads, reduced transport costs
- Improved carbon emissions; supporting net zero targets

In-house Transport

Our modern and flexible vehicle fleet ranges from small urban vehicles all the way up to 44 tonne artics, complete with vehicle mounted forklifts facilitating multi-drop and out of hour deliveries. Our fleet also includes HIAB cranes and retractable trailers facilitating heavy plant lifts

All vehicles are fitted with four way camera systems helping to maximise safety and compliance. By utilising the latest PDA technology, we are able to provide our Clients' access to real time POD data via a dashboard portal.

Container Storage

PRL Logistics Ltd supports our clients' Net Zero targets via a 24/7 container trans-shipment, storage, and distribution service - reducing road miles and carbon emissions.

By strategically minimising road miles, we actively contribute to the reduction of carbon emissions, fostering a sustainable and environmentally responsible approach to supply chain management.

Third Party Logistics

We provide our clients access to a comprehensive suite of services via our 3rd party logistics service including bespoke transportation, inventory management, and order fulfillment, all designed to meet their specific requirements.

Our fully integrated WMS and TMS solutions can be tailored and scaled to enable the smooth and efficient flow of their product, enabling full visibility of their goods at all times.

Case Study

Sainsbury's

Client:

Sainsbury's / Kempower

Description

PRL Logistics were appointed by Sainsburys to support their EV rollout scheme across the UK via the storage and distribution of Kempower & Comsys equipment.

Our one-stop 3PL service allows for a fully managed integrated service including detailed component traceability and instant access to online PODs on delivery.

Case Study

Client:
Argos

Description

PRL Logistics were appointed by Argos to store 180 containers of retail equipment at our 24/7 Doncaster container facility. The containers were delivered from Felixstowe and secured ready for call-off in support of Argos' store demand programme.
