Transport Services & Storage

TRANSPORT & WAREHOUSE SOLUTIONS

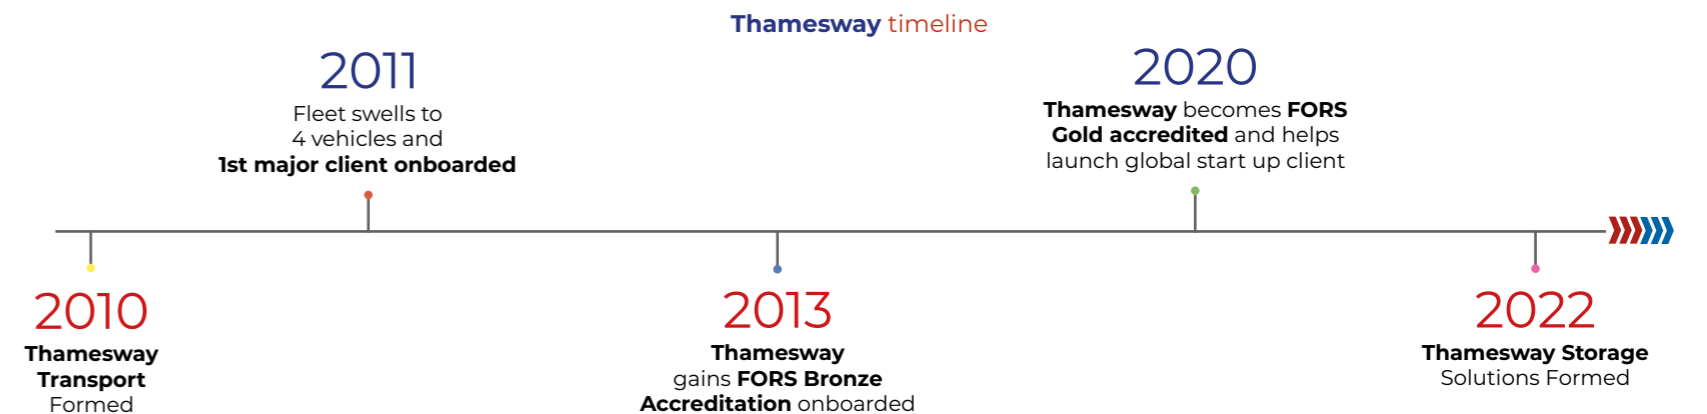

Left to Right: Mike Marshall General Manager, Ian Dent Managing Director, Jane Dent Finance Director and Pete Smith Transport Operations Director

>Welcome

Operating for over 12 years, Thamesway has evolved to provide more than just wheels on the road, through careful recruitment and market analysis we have identified how best to support our clients enabling their growth and ability to offer more services without passing that cost on. We are specialists in micro mobility services from transport through to the complex solutions required for safe handling and transportation of Lithium Ion batteries.

For 2 years we have supported a leading scooter RfP provider with managing their fleets across 8 locations from initial set up to ADR deliveries and have continued in this field adding a further 2 Micro-Mobility clients to our portfolio. In conjunction, our E2E Supply Chain solutions allow us to tap into a network of vetted and dependable hauliers across Europe and the U.K with worldwide solutions available when required.

Our storage solutions cover a wide range of schemes from long term storage through to e-commerce and fulfillment. We have bespoke solutions to cope with all types of freight and our container devanning solutions mean your goods can be unloaded, palletised and reloaded within a day. Recent introductions to our service have seen successful rollout on Groupage Services backed by a dedicated and talented team of Forklift drivers.

»»»» Transport & People: First to Last Mile

As a responsible haulier we have worked hard to earn a reputation as a safe and reliable haulier. We don't believe in excuses or short cuts and this is demonstrated with our fleet.

All our trucks are Euro 6 Compliant, FORS Gold Accredited and undergo regular audits and inspections. With a wide range of vehicles available including our new electric MWB VW Fleet, we have a vehicle to suit your needs. Complimented by professional and passionate drivers, you can be sure your STORAGE SOLUTIONS freight will be in the safest hands.

»» ADR/HIAB

Recent additions to the fleet at Thamesway, include HIAB vehicles or more commonly known as lorry mounted cranes capable of undertaking abnormal loads. This will allow flexibility when considering delivery, should forklift facilities not be so readily available. These 26ton rear steer vehicles have the capacity to carry up to 14 tons in weight. The varying HIAB lifting gear can affect offloads varying from 5 tons at ground level, up to 1750 kgs at a length of 9 metres.

Our FORS Gold accredited vehicles are also qualified and liveried for responsibility on ADR registered loads, and are operated by responsible and experienced drivers with an audited training record.

Various loading attachments such as brick load grabs are also available at your request, to cater for all your transport needs.

»»»» Sustainability

At Thamesway we recognise we have a moral and company obligation to manage and reduce our carbon footprint, the impact to our local community and a positive role to play in preserving our planet. We take this duty seriously and through close collaboration with partners, suppliers and contractors we have committed to a wide range of targets to hit as part of our Environmental Policy.

All our vehicles are Euro 6 Compliant, including company cars and we have recently introduced an all electric Van to our fleet, with a further addition to be added in December. In addition to this, we have fitted our warehouse and office space with motion sensor activated lighting, so we can be confident we only light the areas we are using. Working with our suppliers, we ensure products we use are from renewable sources and ethically sourced.

»» Culture
